Work experience

FULL STACK WEB DEVELOPER
MINSAIT, AMARANTE
Mar 2025 - Jun 2025

- Conceived and built from scratch an internal web application for IT-asset management.
- Designed and implemented a REST API with ASP.NET Core (.NET 9), providing full CRUD endpoints and Swagger/OpenAPI documentation.
- Modeled the database and handled data access using Entity Framework Core on MySQL.
- Integrated CyberArk to securely manage API credentials and secrets.
- Developed the React front-end, consuming the API via Axios and applying responsive UX principles.
- Ensured quality through xUnit unit tests, code reviews on GitHub, and the Scrum framework (daily stand-ups, sprint reviews).
